

Product Boxes

Overview:

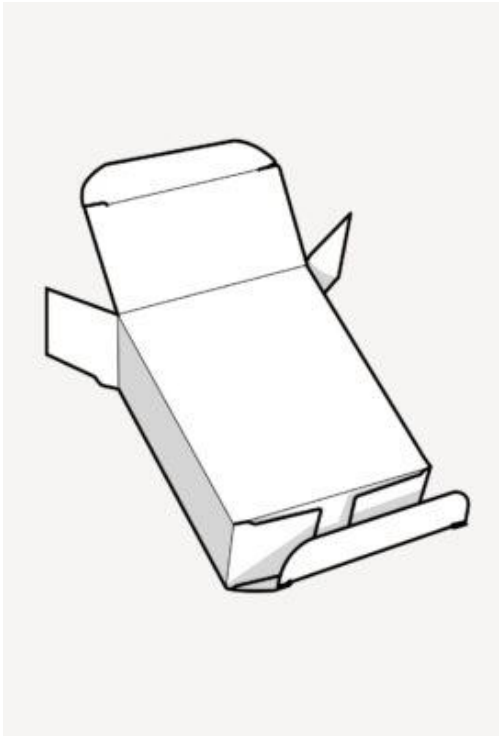

SinaLite’s product boxes offer versatile and dependable packaging solutions designed for a wide range of consumer goods. Engineered for both shelf appeal and functional performance, these boxes are ideal for dry foods, snacks, frozen items, and lightweight consumer products. Each box is produced using high-quality substrates and finishes to ensure structural integrity, print clarity, and consistent converting performance. Whether you require custom formats, durable coatings, or food-safe materials, SinaLite’s boxes are built to meet the needs of modern packaging demands.

Pressure Sensitive Labels (Roll Labels)

Overview:

SinaLite’s roll labels are designed for performance, flexibility, and visual impact across a variety of applications. Whether you need labels for jars, pouches, bottles, or other consumer packaging, our pressure-sensitive labels provide exceptional adhesion and durability. Available in paper, poly, and BOPP materials, these labels are ideal for both hand and machine application. Engineered to handle moisture, refrigeration, and challenging surfaces, they deliver vibrant print quality with consistent registration and reliable performance throughout the product lifecycle.

Formats:

Paper Labels

Durable and economical for dry, rigid surfaces like jars and boxes. Writable and printable in full-color CMYK. Available in permanent or removable adhesive.

Materials

-  • White Bright Paper Permanent
-  • White Bright Paper Removable
-  • White Opaque Paper Permanent
-  • White Semi-Gloss Litho Paper Freezer Permanent
-  • White Litho Paper Wet-Strength Permanent
-  • White Classic Crest Paper Wet-Strength Permanent
-  • Estate #4 Paper Permanent
-  • Silver Foil Paper Freezer Permanent
-  • Pink Fluorescent Paper Permanent
-  • Red Fluorescent Paper Permanent
-  • Green Fluorescent Paper Permanent
-  • Orange Fluorescent Paper Permanent
-  • Yellow Fluorescent Paper Permanent

Poly Labels

Moisture- and chemical-resistant labels for flexible containers like tubes and pouches. The ideal option for long-lasting labels in tough environments.

Materials

-  • White Poly Permanent
-  • Silver Poly Permanent

BOPP Labels

Premium labels with gloss, clarity, and tear resistance. Ideal for refrigerated, wet, or squeezable products. Available in clear, white, or metallic finishes.

Materials

-  • White Gloss BOPP Permanent
-  • Silver Brushed BOPP Permanent
-  • Clear BOPP
-  • White Gloss BOPP Freezer
-  • White Gloss BOPP Permanent PET Liner

Coatings / Laminations

(Flood Coated)

Features

Wind direction

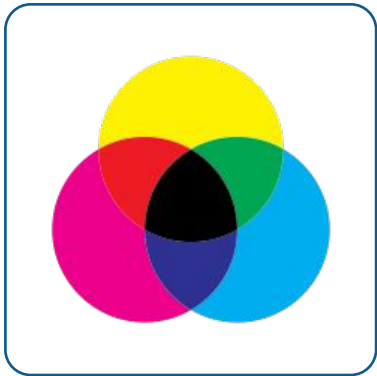

We support multiple unwind directions to match your application process—whether hand or machine applied. Be sure to confirm unwind orientation to ensure correct label positioning during application.

Custom Shapes

Our default is laser die-cutting, included at no extra cost for most shapes. For long-run jobs or highly specific requirements, customers may request a physical die tool at an additional charge.

Printing Options

Standard CMYK

All labels are printed using vibrant, high-resolution 4-color CMYK as our standard. This delivers exceptional shelf appeal and works for most packaging needs.

White Ink

White ink is available as a custom add-on, ideal for printing on clear or metallic substrates.

Industry Use Examples

Paper Labels

- Jars (e.g. nut butters, sauces)
- Supplement bottles
- Promo stickers and price tags
- Craft packaging and paper bags
- Coffee and tea box seals

Poly Labels

- Stickers on stand-up pouches
- Tubes for cosmetics and creams
- Squeezable condiment bottles
- Refill packs for soaps and detergents
- Wipes and flexible packaging closures

BOPP Labels

- Juice and smoothie bottles
- Ready-to-drink cold brew coffee
- Personal care bottles (shampoo, lotion)
- Frozen product sleeves and wraps
- High-speed retail labeling systems

Requirements

Artwork PDF file | Dieline (required if custom shape is needed) | Spot color for white ink (if required)

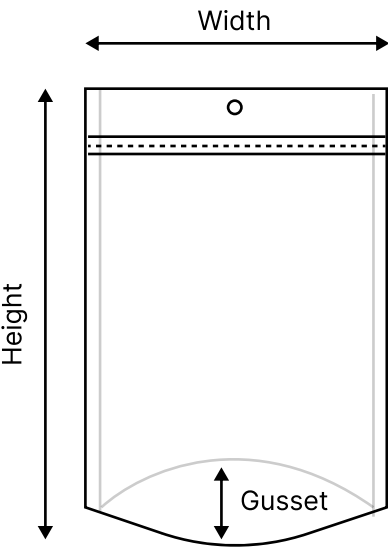

Pouches

Overview:

Pouches are a high-impact, ready-to-fill packaging solution that combine visual appeal, protective performance, and consumer convenience. At SinaLite, pouches are digitally printed and custom-converted in-house, giving brands the flexibility to produce vibrant, high-quality packaging in short runs without the long lead times associated with traditional manufacturing. Available in both stand-up and lay flat formats, pouches are ideal for a wide variety of products including snacks, pet treats, supplements, and cannabis.

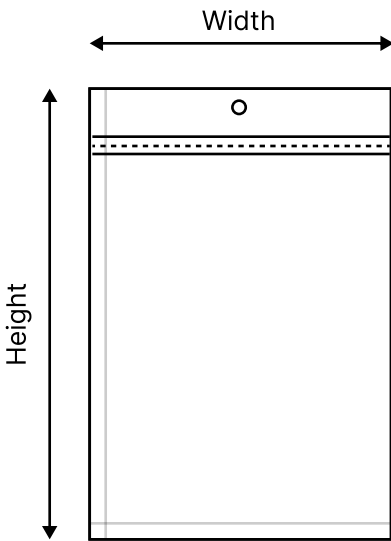

Formats:

Stand Up Pouches

These pouches feature a bottom gusset that expands, letting them stand upright for better shelf presence and easy filling.

Lay Flat Pouches

These pouches are sealed on three sides, creating a sleek, flat package ideal for lightweight or single-serve products.

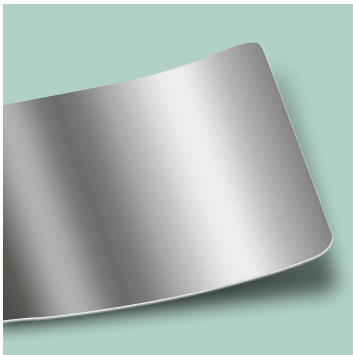

Base Materials

White PE

Clear PE

METPET + Clear PE

Laminations

Gloss Lamination

Matte Lamination

Soft Touch Lamination

Base Materials are all rated for direct food contact

Features

Child Resistant Zipper

CR zippers on pouches provide child-resistant, secure closures for safety-sensitive products.

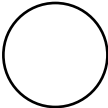

Tear Notch

Tear notches provide a convenient, pre-cut opening in pouches, allowing consumers to easily open the package without additional tools, while maintaining product freshness and integrity until use.

Standard Zipper

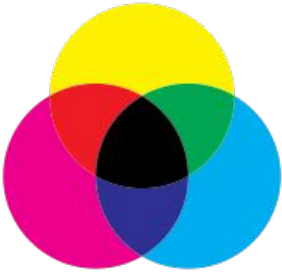

Standard zippers on pouches offer easy, resealable closures for convenient access and product freshness.

Standard Hole

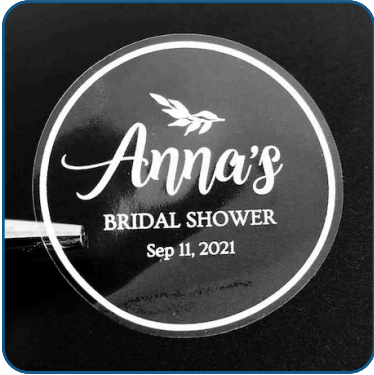

A standard hole is a circular cut in packaging used for hanging products on retail displays.

Printing Options

Standard CMYK

All pouches are printed using vibrant, high-resolution 4-color CMYK as our standard. This delivers exceptional shelf appeal and works for most packaging needs.

White Ink

White ink is available as a custom add-on, ideal for printing on clear or metallic substrates.

Applicable to Clear PE material and METPET

Roll Stock

Overview:

Roll stock is the foundational format of SinaLite’s flexible packaging line, provided as large continuous rolls of printed and laminated film. It is designed to run on vertical and horizontal form-fill-seal (FFS) machinery, where the packaging is formed, filled with product, and sealed in a single automated process. This format is ideal for high-volume production and offers excellent efficiency, cost control, and material usage. Commonly used across food, nutraceutical, and personal care industries, roll stock is well suited for products like snack bars, condiment sachets, edibles and powdered drink mixes.
